3.1 Metrics

Million Server Calls (MSCs) is a unit of measure by which the IBM SaaS can be obtained. MSCs are one (1) million Server Calls. A Server Call is data passed to and processed by IBM SaaS as a result of a tagged event, initiated by a tracked visitor for one Client ID. A Server Call processed by different Client IDs will be counted as a unique Server Call for each unique Client ID. A Client ID separates and/or controls access rights to data in the IBM SaaS which may encompass processed data from one or more Customer web sites. Sufficient entitlements must be obtained to cover the number of Million Server Calls used during the measurement period specified in a Proof of Entitlement (PoE) or Transaction Document.

Million Marketing Impressions (MMIs) is a unit of measure by which the IBM SaaS can be obtained. MMIs are one (1) million collected and processed marketing impressions. Sufficient entitlements must be obtained to cover the number of MMIs used during the measurement period specified in a Proof of Entitlement (PoE) or Transaction Document.

An Entity ID is a unique identifier which may be referred to in the SaaS environment by different terms that may include, but would not be limited to, Client ID, customer ID, partner ID, supplier ID, vendor ID or EDI ID within the IBM SaaS. Sufficient entitlements must be obtained to cover the number of Entity IDs identified in the IBM SaaS during the measurement period specified in Customer's Proof of Entitlement (PoE) or Transaction Document.

For the IBM SaaS, the Entity ID (often referred to as a Client ID in the SaaS usage) separates and/or controls access rights to data in the IBM SaaS which may encompass processed data from one or more web sites. Additional Entity IDs are needed if Customer exceeds amount entitled with the IBM SaaS.

Engagement is a unit of measure by which the services can be obtained. An Engagement consists of professional and/or training services including but not limited to a training event, business analysis, or a deliverable-based services event. Sufficient entitlements must be obtained to cover each Engagement.

At any time Customer may request that any Personal Data provided as part of registering for an Account or use of the IBM SaaS be corrected or removed from Account information and this information will be corrected or removed, but removal may prevent access to the IBM SaaS.
